

PDF EXPORT and PROFILE INSTRUCTIONS FOR A COMPLIANT PDF X-1a

1. Copying and installing the .icc or .icm profiles.

Mac Platform

Copy the .icc file into the **MacHD>>Library>>ColorSync>>Profile** folder. InDesign will need to be restarted to make the profile available.

PC Platform

Right Click the .icm file and select "Install Profile"
InDesign will need to be restarted to make the profile available.

2. Follow the .pdf file for instructions on the correct settings when exporting your pdf from InDesign.

3. If you are submitting your files via ftp

FCI Digital ftp info.

Host name: 98.103.118.66
User ID: guest
Password: password

Note: Do not use spaces or special characters in the filename of your upload. It is recommended to compress your files to avoid the possibility of corrupt images/files.

We recommend using **Fetch** or **Filezilla** as an ftp client.
An internet browser is incompatible and will not allow you to upload.
